

Covid-19 and your information - Updated on 30th September 2020

This notice describes how we may use your information to protect you and others during the Covid-19 outbreak. It supplements our main Privacy Notice which is available on our website and in the waiting room.

The health and social care system is facing significant pressures due to the Covid-19 outbreak. Health and care information is essential to deliver care to individuals, to support health and social care services and to protect public health. Information will also be vital in researching, monitoring, tracking and managing the outbreak. In the current emergency it has become even more important to share health and care information across relevant organisations.

Existing law which allows confidential patient information to be used and shared appropriately and lawfully in a public health emergency is being used during this outbreak. Using this law the Secretary of State has required NHS Digital; NHS England and Improvement; Arms Length Bodies (such as Public Health England); local authorities; health organisations and GPs to share confidential patient information to respond to the Covid-19 outbreak. Any information used or shared during the Covid-19 outbreak will be limited to the period of the outbreak unless there is another legal basis to use the data. Further information is available on gov.uk [here](#) and some FAQs on this law are available [here](#). During this period of emergency, opt-outs will not generally apply to the data used to support the Covid-19 outbreak, due to the public interest in sharing information. This includes [National Data Opt-outs](#). However in relation to the Summary Care Record, existing choices will be respected. Where data is used and shared under these laws your right to have personal data erased will also not apply. It may also take us longer to respond to Subject Access requests, Freedom of Information requests and new opt-out requests whilst we focus our efforts on responding to the outbreak.

In order to look after your health and care needs we may share your confidential patient information including health and care records with clinical and non clinical staff in other health and care providers, for example neighbouring GP practices, hospitals and NHS 111. We may also use the details we have to send public health messages to you, either by phone, text or email.

During this period of emergency we may offer you a consultation via telephone or videoconferencing. By accepting the invitation and entering the consultation you are consenting to this. Your personal/confidential patient information will be safeguarded in the same way it would with any other consultation.

We will also be required to share personal/confidential patient information with health and care organisations and other bodies engaged in disease surveillance for the purposes of protecting public health, providing healthcare services to the public and monitoring and managing the outbreak. Further information about how health and care data is being used and shared by other NHS and social care organisations in a variety of ways to support the Covid-19 response is [here](#).

NHS England and Improvement and NHSX have developed a single, secure store to gather data from across the health and care system to inform the Covid-19 response. This includes data already collected by NHS England, NHS Improvement, Public Health England and NHS Digital. New data will include 999 call data, data about hospital occupancy and A&E capacity data as well as [data provided by patients themselves](#). All the data held in the platform is subject to strict controls that meet the requirements of data protection legislation.

A revised [Data Provision Notice](#) (DPN) has now been issued for this continuing data collection.

The objective of this collection is on an ongoing basis to identify patients registered at General Practices who may be:

- clinically extremely vulnerable if they contract COVID-19
- at moderate or high risk of complications from flu or COVID-19

This General Practice Extraction Service (GPES) data will be extracted weekly and be used to assist in producing a weekly update of the Shielded Patient List (SPL).

The data, as specified by the DPN, supports the COVID-19 Public Health Directions 2020 from the Secretary of State for Health and Social Care. Organisations that are in scope of the notice are legally required to comply.

General Practices will be automatically enrolled into the data extract and will not be required to participate. This will reduce burden on GP's as there will be no offer of participation on the Calculating Quality Reporting Service (CQRS).

NHS Digital has produced [a COVID-19 response transparency notice](#)

In such circumstances where you tell us you're experiencing Covid-19 symptoms we may need to collect specific health data about you. Where we need to do so, we will not collect more information than we require and we will ensure that any information collected is treated with the appropriate safeguards.

We may amend this privacy notice at any time so please review it frequently. The date at the top of this page will be amended each time this notice is updated.
